Size Emergency shower MB100 DDM

Article number	999999979
Material	Steel with a plastic shower head
Pipework	Galvanized
Operation	Stainless steel push handle
Water flow	80 l/min. (2 Bar G)
Water supply	1" BSP internal thread
Wall mounting	Galvanized wall plate

Specifications Emergency shower MB100 DDM

Eyebaths and emergency showers for industrial application for outhouse use and for mounting on an (outside) wall. The emergency shower drains automatically after use! The valve is located at the inside of the wall (where there is no danger of frost) and the operation at the outside of the wall. Because of this principle the emergency shower is frost proof! Products shown are applicable within the PGS 15 regulations.

Features:

- Design according to ANSI Z 358.1 and CE EN 15154.
- Suitable for outdoor use (wall mounting).
- Eye showers equipped with perlators/diffusers for a pleasant, sparkling and oxygenated water spray.
- Perlators/diffusers fitted with dust caps.
- Bowl eyebath in stainless steel.
- Delivery in package, assembly by client.
